SharePoint Home sites – New features!

- Exclusively for the SharePoint Hackathon participants!
- Microsoft has been working on some great new features for SharePoint Home sites and Viva Connections.
- If you are participating in the hackathon to build out great portals, check out the new preview features we can enable for you.
- Features are in early preview state, and may change before GA or delayed. Please do not use in production tenants.
- Submit your dev tenant ID here : https://aka.ms/SPHomeSitePreviewFeaturesSignup

SharePoint Hackathon

March 2-16, 2026

Design, create, share! We are excited to invite you to a hackathon dedicated to crafting exceptional employee experiences using AI and the latest SharePoint features. We encourage you to generate real examples of creative use of new UX and AI capabilities within SharePoint.

Whether you're a business user, designer, architect, or developer, there's a place for you. The SharePoint Hackathon will showcase the diverse possibilities within the SharePoint ecosystem.

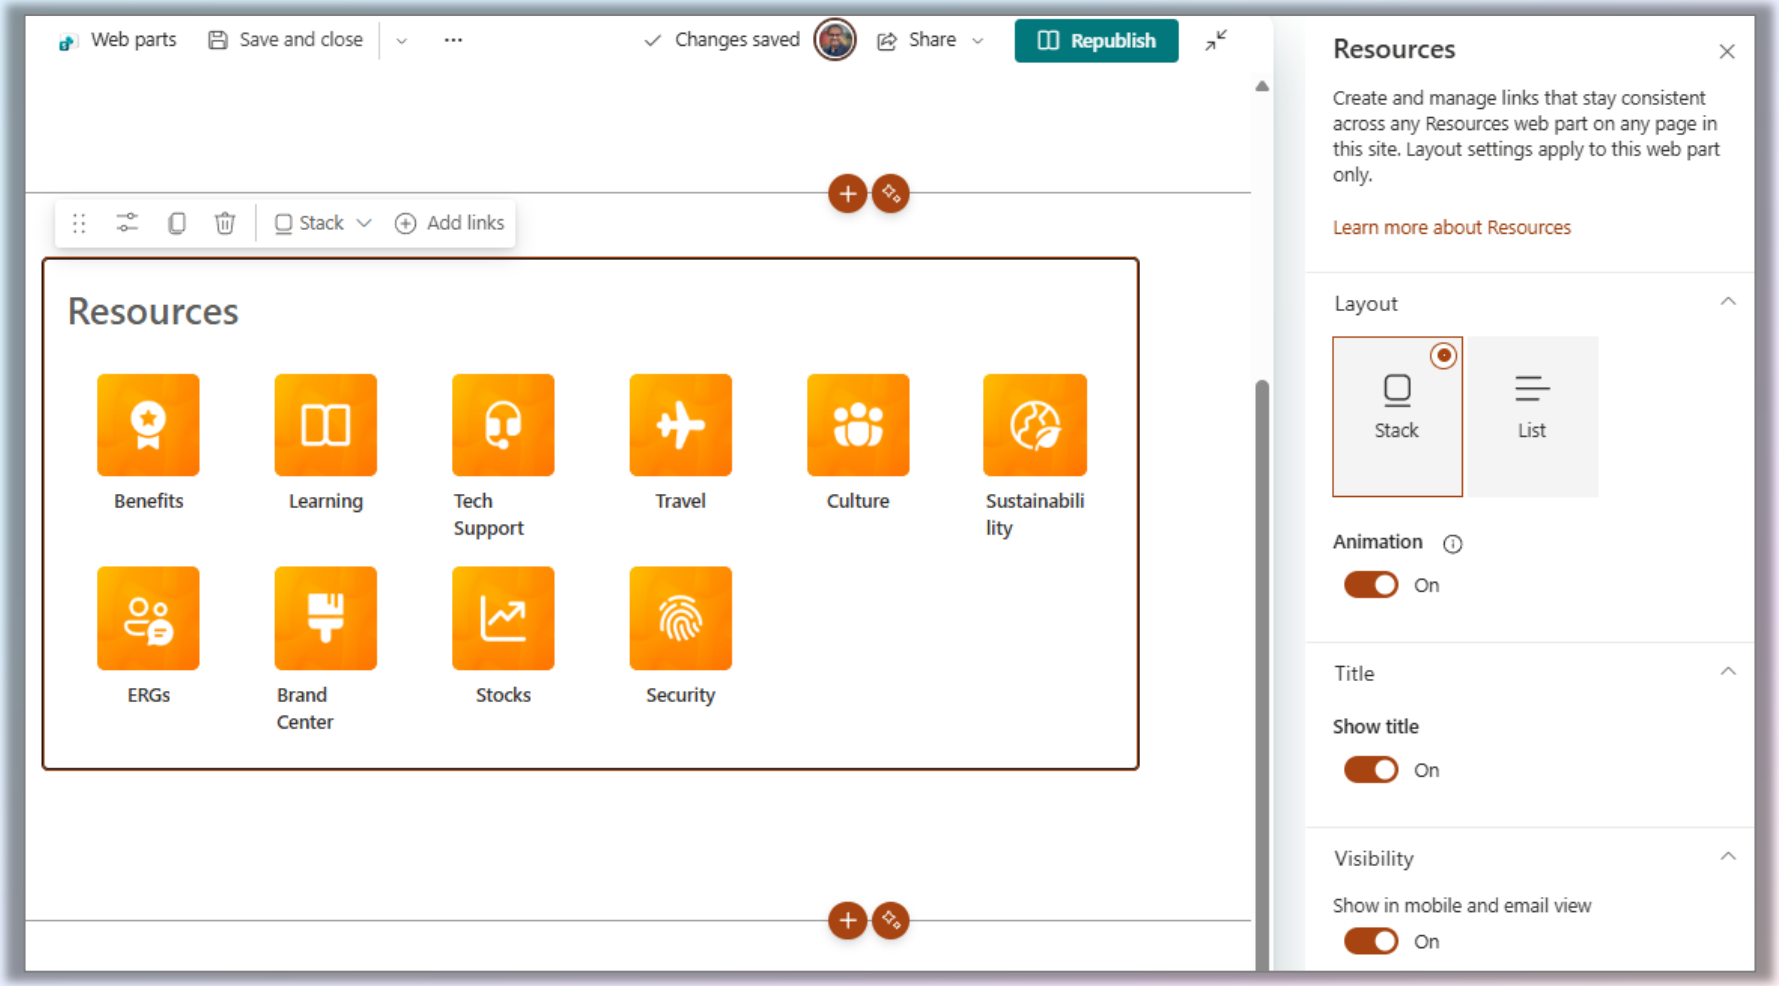
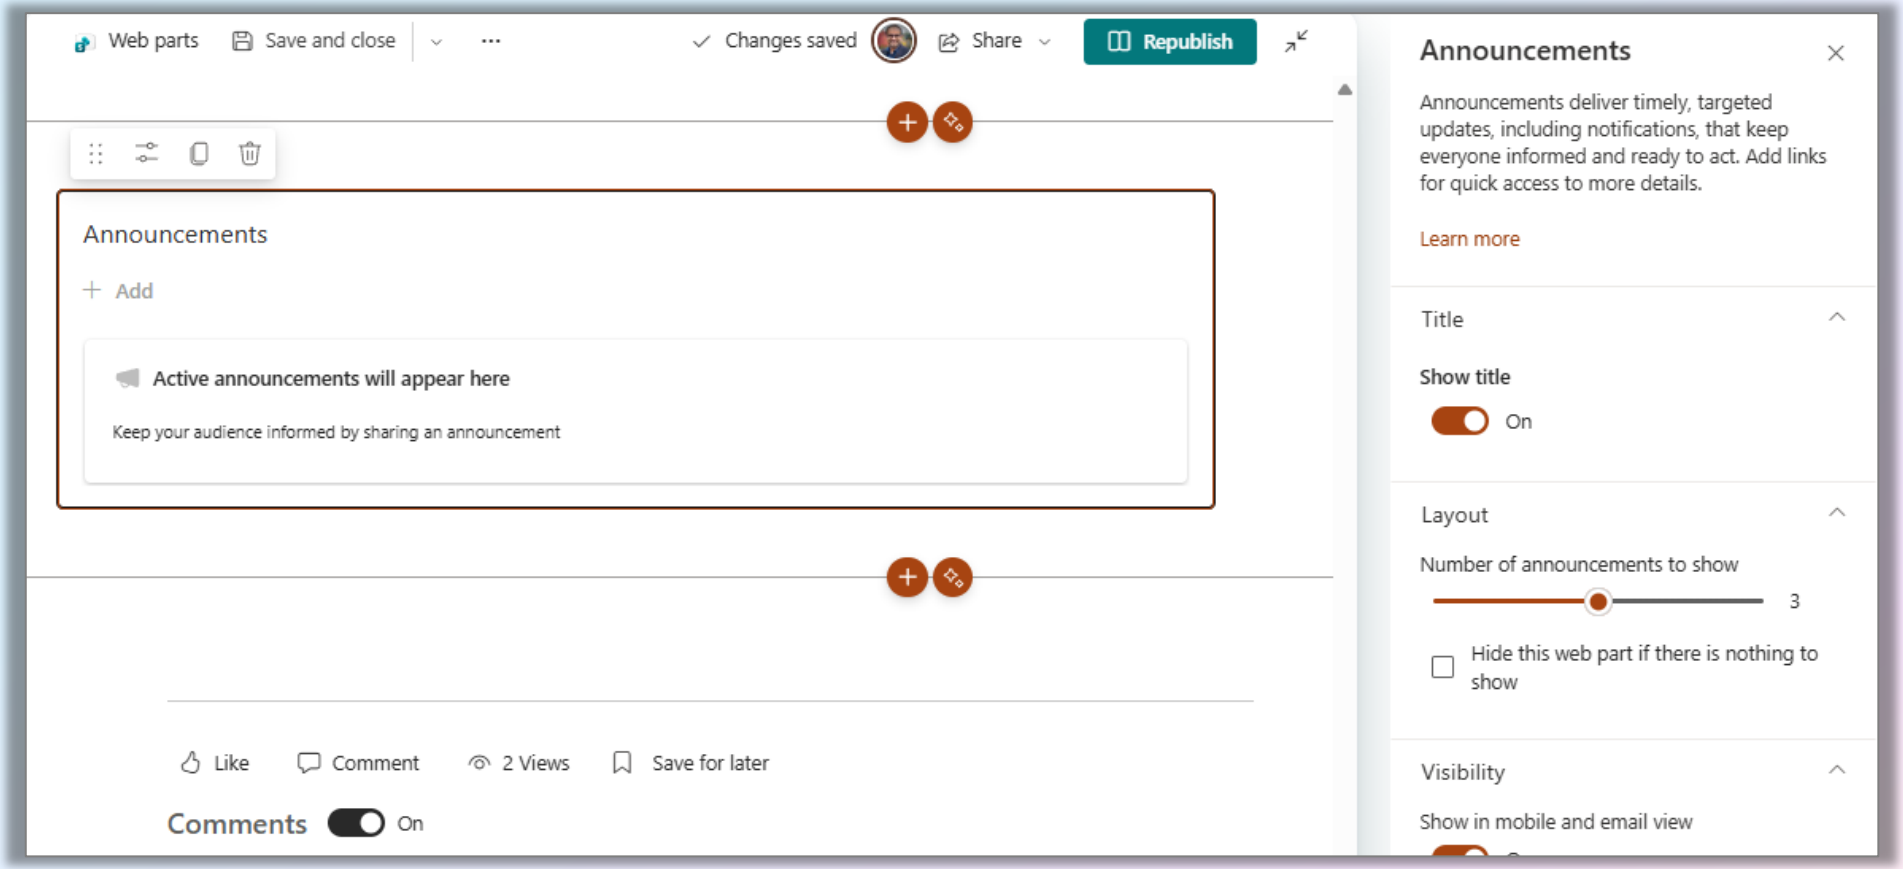
List of features enabled in this preview

1. “Resources” web part available in SharePoint Home site. Unlike quick links web part, the data source for resources is shared across the site. Which means the same set of links can be display on every page and managed centrally
2. “Announcements” web part. The Viva Connections Announcements feature is now available as a web part. No Viva premium license needed for using this web part with Teams notifications.
3. New News web part layout – Filmstrip. Similar to the “Spotlight” experience in Viva Connections
4. Create a Home site from SharePoint admin center. Viva Connections, now called “SharePoint app in Team” will be a feature to configure in the Home site
5. Ability configure the Teams desktop and Teams mobile experience of Viva Connections (which will be called SharePoint app in Teams)

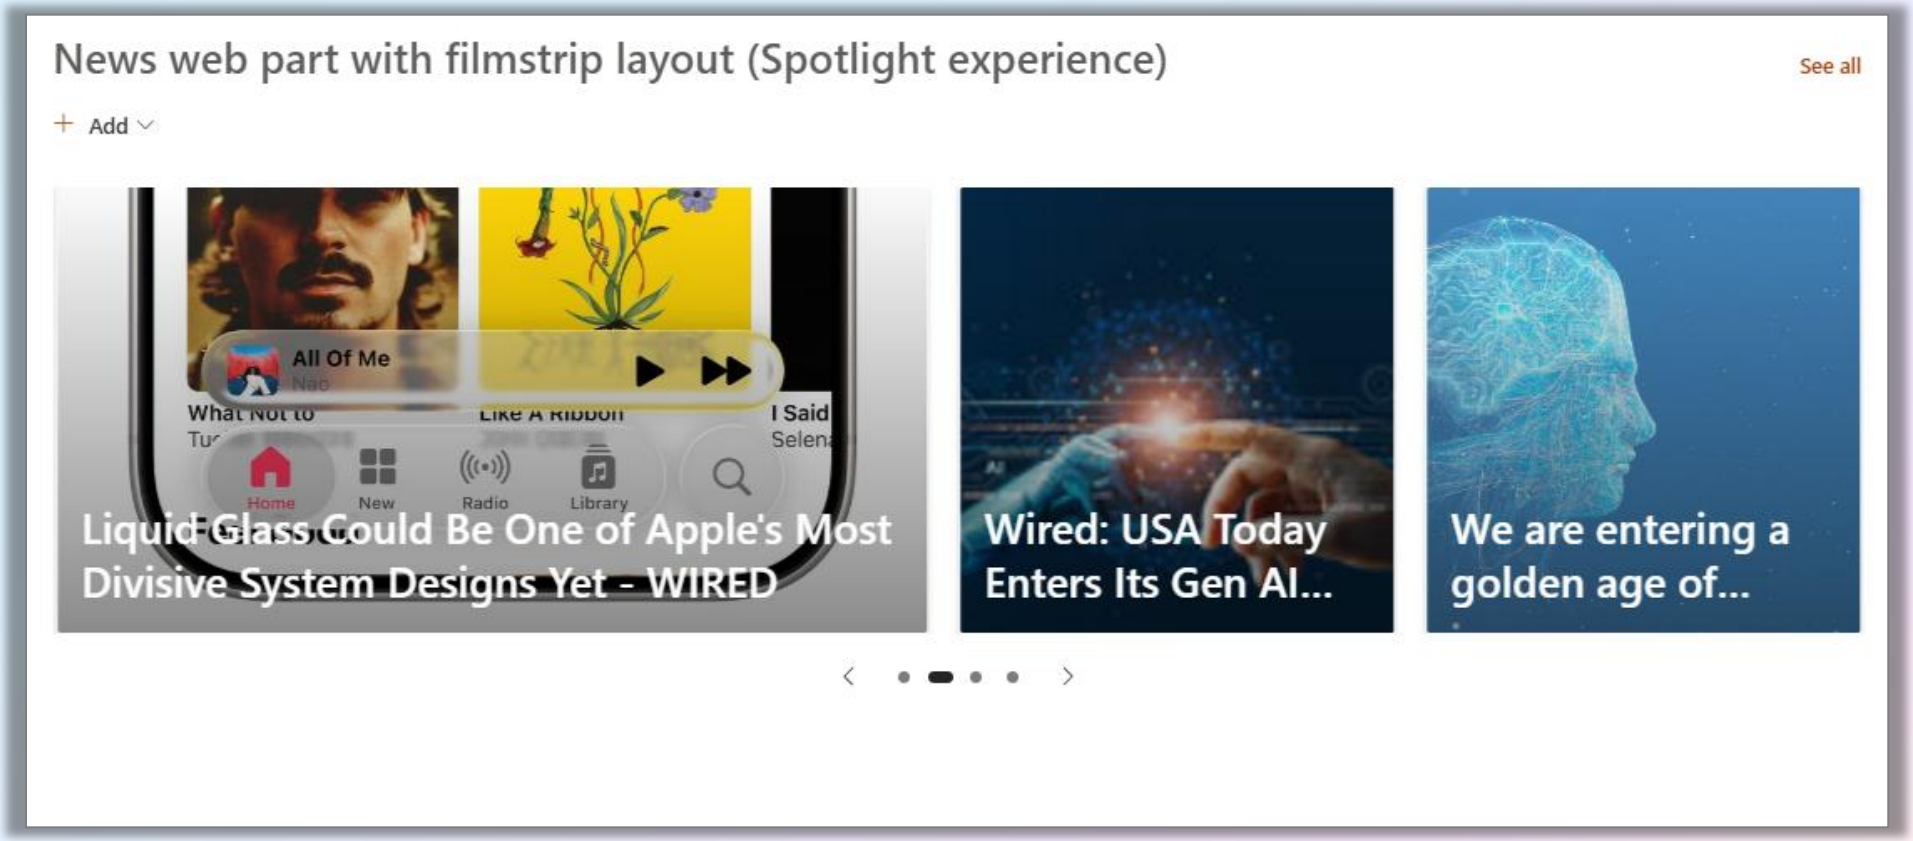
Resources Web part in SharePoint Home site



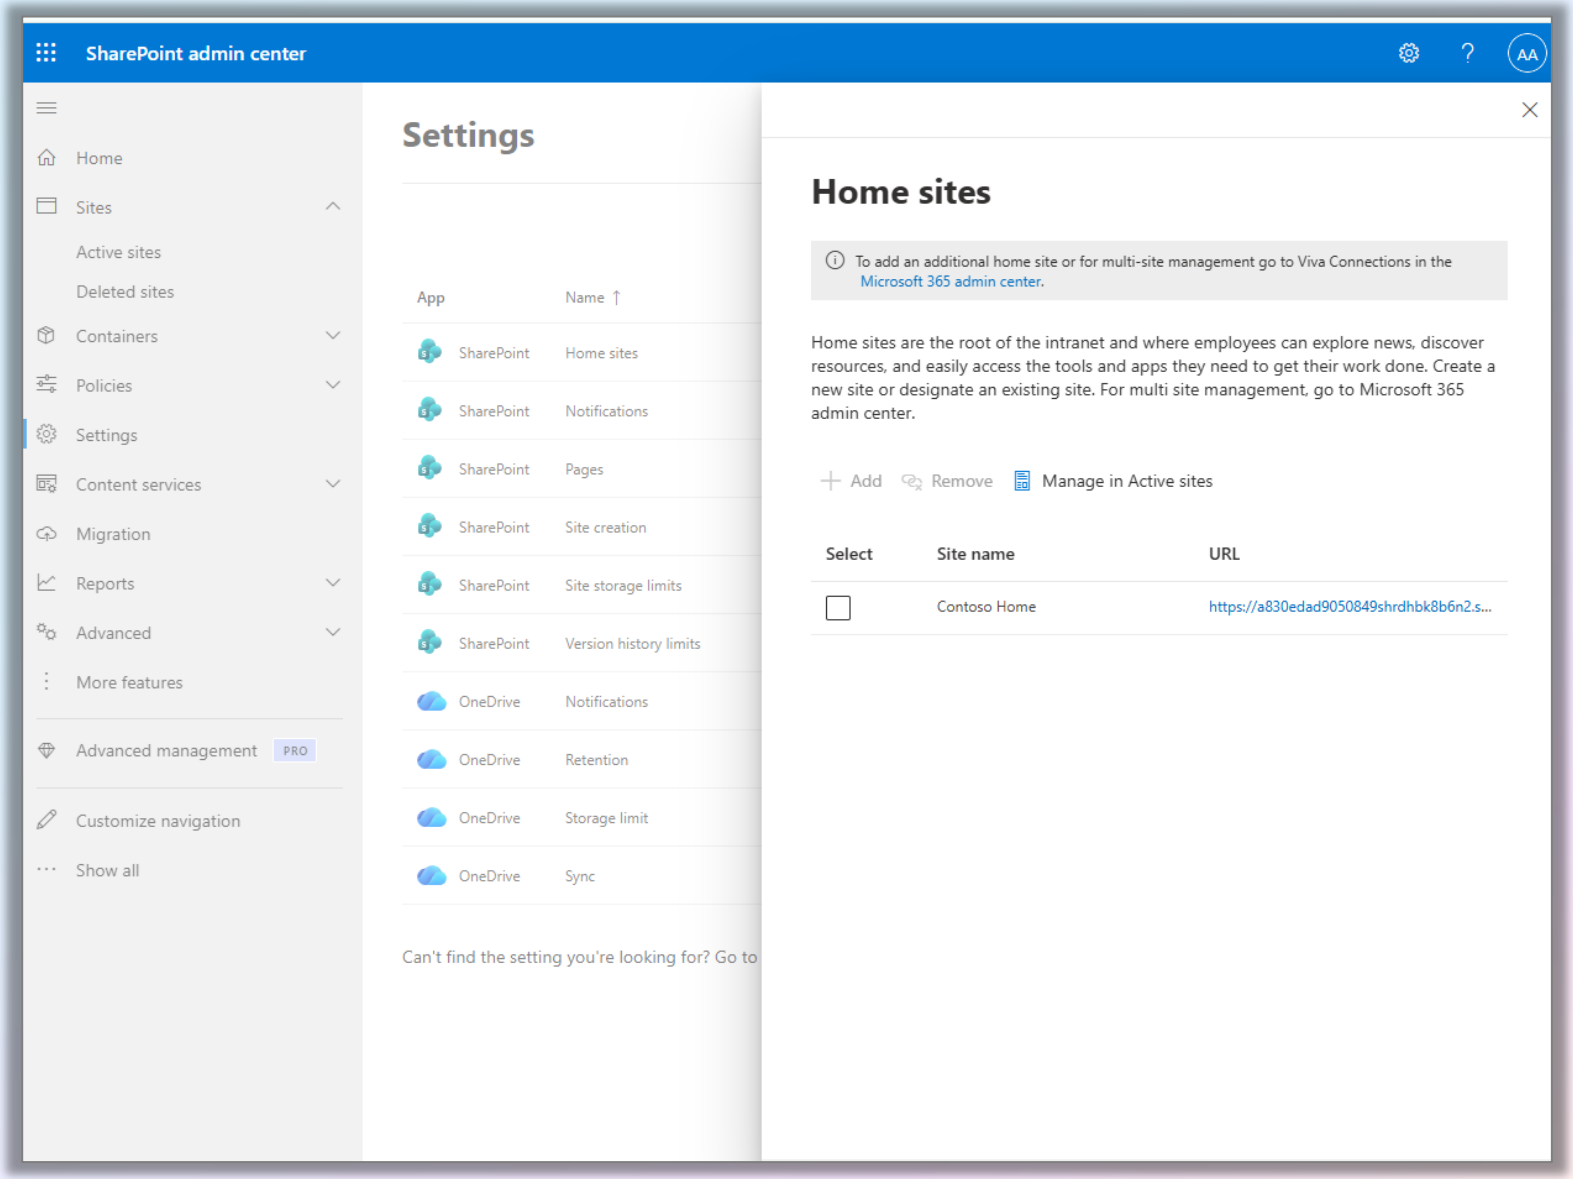
Announcements Web part in SharePoint Home site



Spotlight like layout for News Web part

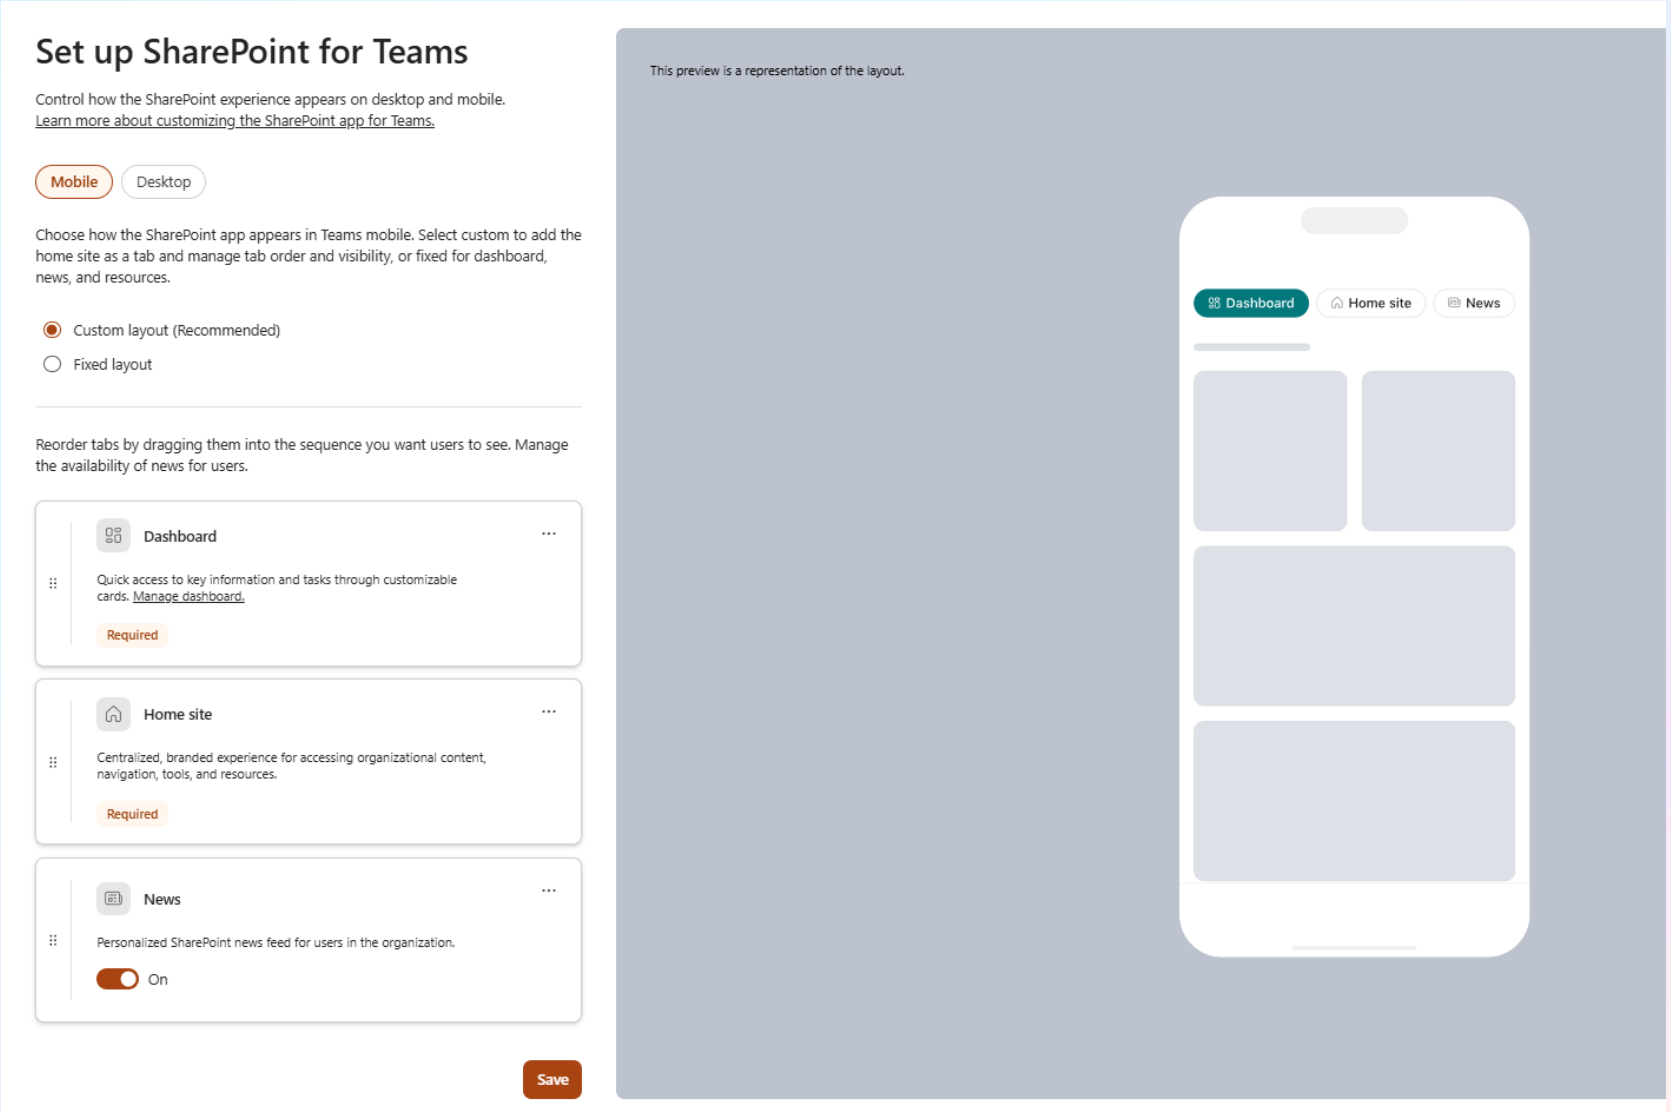


Management in SharePoint Admin center



SharePoint app in team Set up

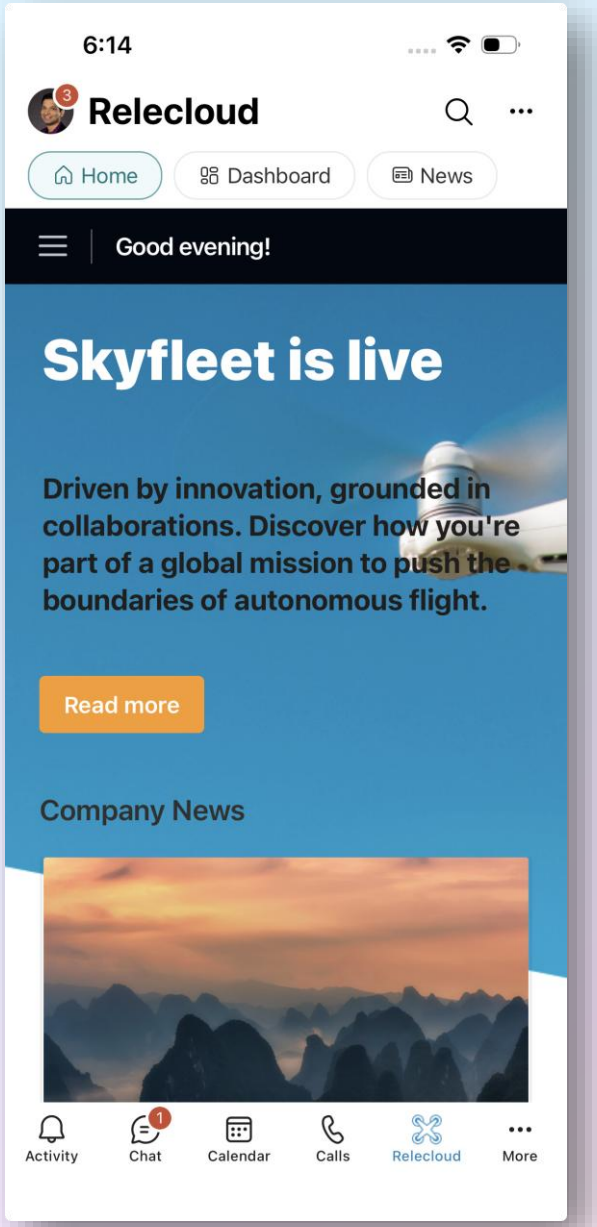
Customize the experience for Teams mobile



SharePoint app in team Set up

Customize the experience for Teams desktop

SharePoint Home site as a pill in the Mobile app



Navigation menus including Site, hub and global navigation in the home site and other pages

- Start Targeted Release roll out
  - Demo at M365 conference

May 2026

- GA of features including renaming of select Connections experiences to “SharePoint”

Classified as Microsoft Confidential

Updates to Viva Connections

1. No change to Viva Suite or C&C packaging
2. *Viva Connections* brings your SharePoint portal into Teams
3. *Viva Connections* will be a feature of SharePoint Home sites.
4. *Viva Connections* UX features will be available in SharePoint as web parts.
5. *Viva Connections* in Teams will be renamed to SharePoint. (but Connections will continue to be one of the Viva apps)
6. *Viva Connections* mobile will allow the home site as leading experience.
7. No interruptions to existing deployments – just more flexibility and features to use!
